Customer Problem Statement

The Customer Problem Statement helps identify students' learning needs, challenges, and expectations. Understanding the student's point of view enables the development of **EduGenie – Google Gemini Powered Learning Assistant**, an AI-powered educational platform that provides concept explanations, answers academic questions, generates quizzes, summarizes learning materials, and recommends personalized learning paths. This helps students learn more effectively, improve their understanding, and achieve better academic performance.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student preparing for examinations.	Understand difficult concepts and complete my studies efficiently.	I find it difficult to get clear explanations, personalized study materials, and instant answers in one place.	Educational resources are scattered across multiple platforms and require significant time to search and understand.	Frustrated and less confident about my exam preparation.
PS-2	A college student.	Practice quizzes and revise topics quickly.	Creating quizzes and summarizing lengthy notes manually is time-consuming.	Existing learning platforms do not automatically generate quizzes and summaries based on my learning needs.	Overwhelmed and stressed during revision.

PS-3	A learner seeking personalized guidance.	Follow an effective learning plan based on my knowledge level.	I do not know which topics to study first or how to improve weak areas.	Most learning platforms provide generic content instead of personalized recommendations.	Confused and unsure about my learning progress.
