

Coding&Solution

Date	3July2026
TeamID	XXXXXX
ProjectName	EduGenie – AI-Powered Educational Assistant
MaximumMarks	5Marks

Coding&Solution

This document evaluates the quality, completeness, and implementation of the **EduGenie** project. The solution successfully integrates Generative AI capabilities to provide intelligent educational assistance through question answering, concept explanation, quiz generation, text summarization, and personalized learning recommendations. The application follows clean coding practices, modular architecture, and efficient resource utilization to ensure maintainability and scalability. Based on the project requirements, all major functionalities have been implemented and tested successfully.

Instructions

1. Ensure the code is modular, maintainable, and properly documented.
2. Implement all core educational AI functionalities.
3. Include source code, configuration files, and setup instructions.
4. Maintain version control using GitHub.
5. Ensure smooth integration between frontend, backend, and AI services.

SolutionSummary

Field	Details
RepositoryLink/URL	https://github.com/chantamma2005/EduGenie_Google_Gemini_Powered_Learning_Assistant

ProgrammingLanguage(s)	Python, HTML, CSS, JavaScript
Framework(s)Used	FastAPI, Jinja2
AI Models / Services	Gemini API, LaMini-Flan-T5, Transformers
KeyFeaturesImplemented	Intelligent Question Answering, Concept Explanation, Quiz Generation, Text Summarization, Personalized Learning Path Recommendations
Frontend	Responsive HTML + CSS User Interface
Backend	FastAPI REST APIs
Pending/IncompleteFeatures	None
Setup/RunInstructions	Install dependencies using <code>pip install -r requirements.txt</code> Run the application using <code>uvicorn app:app --reload</code>

CodeQualityChecklist

S.No	Criteria	Status(Yes/No)
1	Code is modular and organized into functions/classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments and documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	API endpoints function without critical errors	Yes
6	Frontend and backend integration is successful	Yes
7	Environment variables are used for API key management	Yes
8	Code is committed to a version control repository	Yes
9	Reusable utility functions are implemented	Yes
10	Application follows clean coding standards	Yes
